As a leader, have you helped your teams unleash their potential? Maybe it’s time to...

**GO Team**

Powering Team Performance

Leaders’ Edition

All around the world, GO Team’s library of 18, just-in-time modules is helping organizations build and maintain high-performing workgroups.

As GO Team grows, people keep saying: “I’m a leader of teams. What do you have for me?”

Introducing GO Team for Leaders. If you are in charge of developing teams in your organization, there’s no need to create something from scratch. GO Team for Leaders is built on the same great content as GO Team. That means leaders can equip themselves to build teams... and then be ready to deliver the corresponding GO Team module within the actual team.

Ready to GO Team? Contact us today for more information!

GO Team training is delivered via a series of short modules that are between two and four hours in length. The participant guides lead the team through energizing exercises on the given topic.

GO Team for Leaders equips you to build and develop the teams in your organization. The seven modules will introduce you to the most pressing needs that your teams face.

Where should you begin? That’s up to you! GO Team modules can be configured in any order. Identify the needs that are most relevant to your leadership, and then build your own learning agenda!

The seven modules are:

- **Introduction to Teams**
- **Building on Style Differences**
- **Enhancing Team Communication**
- **Running Effective Team Meetings**
- **Avoiding Groupthink**
- **Sparking Team Creativity**
- **Managing Change**

No PowerPoint lectures! Exercises in each of the modules are involving, active, and fun. Leaders learn by continually connecting theory to practice, while exploring big ideas and translating them to action.
